

Setup on RStudio Cloud

Data Wrangling in R

Setup on RStudio Cloud

1. Sign up for RStudio Cloud or log in using your preferred credentials.

Setup on RStudio Cloud

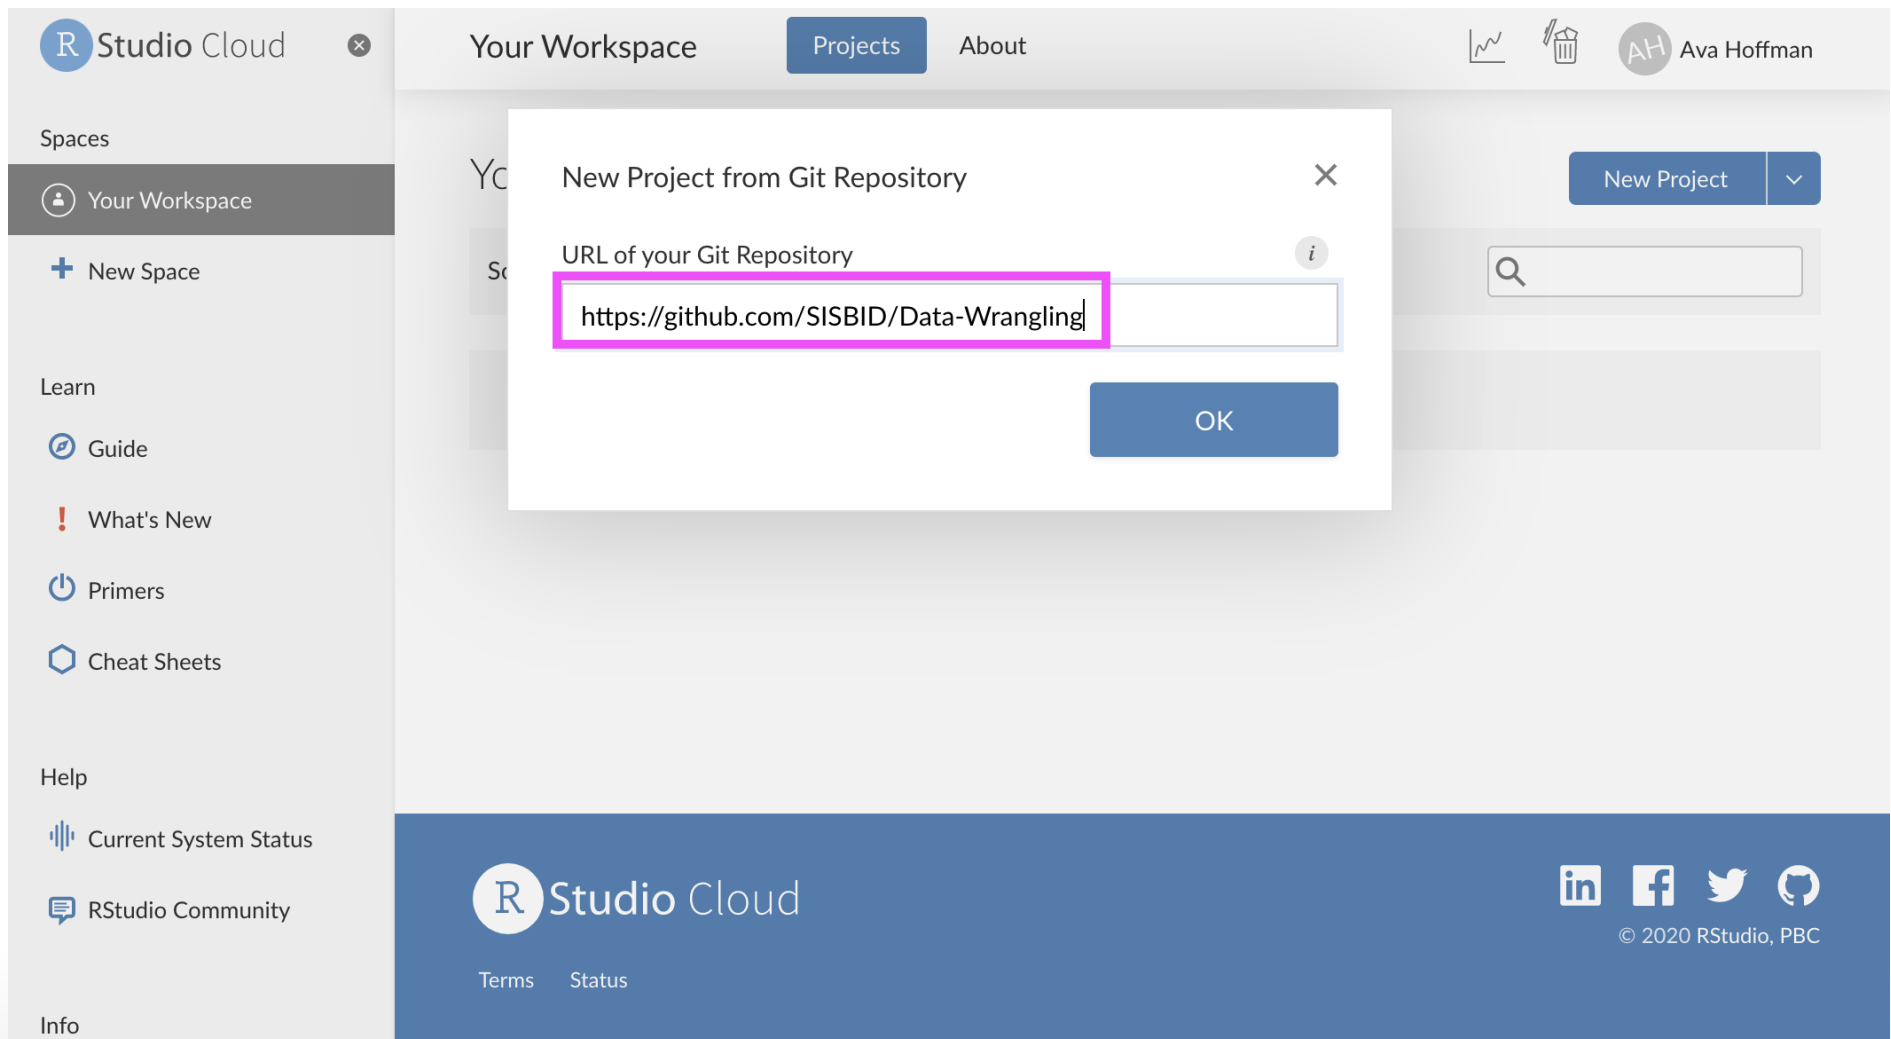

1. Once logged in, select the “New Project” dropdown in “Your Workspace” and select “New project from Git Repository”.

The screenshot displays the RStudio Cloud web interface. On the left is a sidebar with navigation links: 'Spaces' (with 'Your Workspace' selected), 'New Space', 'Learn' (with links to 'Guide', 'What's New', 'Primers', and 'Cheat Sheets'), 'Help' (with links to 'Current System Status' and 'RStudio Community'), and 'Info'. The main content area is titled 'Your Workspace' and contains a 'Projects' tab. Below the tab is a 'Your Projects' section with a 'Sort By name' dropdown and a 'New Project' button. A dropdown menu is open from the 'New Project' button, showing two options: '+ New Project' and 'New Project from Git Repository', which is highlighted with a pink rectangular border. The main area currently displays 'no projects'. The footer includes the RStudio Cloud logo, social media icons for LinkedIn, Facebook, Twitter, and GitHub, the copyright notice '© 2020 RStudio, PBC', and links for 'Terms' and 'Status'.

Setup on RStudio Cloud

1. Enter the link to the class GitHub repository (<https://github.com/SISBID/Data-Wrangling>) and click “OK”. The project will take a bit of time to deploy.

Setup on RStudio Cloud

1. You should now see files listed in your workspace (including some datasets we'll be using). Feel free to change any files here - they are yours now! For the most up-to-date versions of files, please visit the website: <http://sisbid.github.io/Data-Wrangling/>.
